Address: 60311, Frankfurt am Main

// MY EXPERIENCE

Chat app -real time listener: bit.ly/3VvDoto

- This application was designed in raw HTML,CSS and Javascript code (no libraries) and applying Firebase database to create , store, delete with real time listener

Travel guides app : bit.ly/3OHnfwI

-This application using HTML, CSS, Firebase authentication, supports sign in, sign up and log out, can create guides or see guides from other if you have an account. It is really helpful to check before any trip.

E-commerce app: https://emart-react.vercel.app/

-This app is using React, React Redux. It is a e-commerce app about latest fashion, you can check the style, add to cart and also purchase products.

Save favourite youtube videos app : bit.ly/3iceUVz

-This application can help you storing list of favourites videos on Youtube just by simply adding a link, delete it or access it later, datas storing by local storage. Using HTML, CSS and Javascript.

Recipes app : bit.ly/3u4fsQ7

-A simple recipes app using fetch API to search recipes by keywords, add to list favourite recipes, allows you to access later by local storage. Using HTML, CSS and Javascript.

Post-UI : bit.ly/3VcPMNd

-This is based on a blog idea, which supports CRUD and calls API from the server.

Mini-games-app: bit.ly/3OODolK

-An app to help us relieve stress, by playing some old days games can help our brain distract and back to studying or working with an efficient same at beginning, no long-term game. You don't need to spend hours on a game. Just pure relax, test it out.

// EDUCATION

Self teaching Web development 2019 - present

FRONT END DEVELOPMENT

Open University, Ho Chi Minh City / 2010 -2015

BACHELOR OF CIVIL ENGINEERING

LINH NGUYEN

Front end Developer

// MORE ABOUT ME
// AND MY EDUCATION
// STORY

Hello there, I'm a self-taught front-end developer with a background in civil engineering. Originally from Vietnam, I now live in Frankfurt am Main, Germany. I'm passionate about coding, cooking, and traveling.

When I was 18 and needed to choose a major for university, I wasn't sure what I wanted to do with my life. I've always been good at math and logic, so I decided to study civil engineering. While I don't regret my decision, I realized that my true passion lies in web development.

I began learning about web development when my sister opened a coffee shop and we needed a simple website to showcase the menu and allow customers to order online. With just HTML and CSS, I was able to create a website that helped bring in more customers. Soon, other shops nearby asked me to create websites for them as well.

My biggest strength is my love of learning and my ability to pick up new skills quickly. While I don't have a formal computer science degree, I'm following the same curriculum that a computer science student would. As a civil engineer, I already had experience with math, physics, programming, and problem-solving, which are all relevant to web development.

I'm eager to continue learning and growing as a front-end developer. While I may not have a lot of experience yet, I believe that my passion, dedication, and positive attitude will make me a valuable asset to any team. I hope that you will consider me for a role at your company, but if not, I will continue to learn and improve. Thank you for taking the time to read my application, and I hope to hear from you soon.
